DISPOSABLE
LINEAR STAPLER CUTTER

- Particular Joining system on the closed and.
  Guarantee the single hand operation.
- Plastic locating block
  The suture line is extented for 1.5 staples which make the suture line longer than the cutting knife not to cut the further tissue and avoid the tissue damage.
- Locking system for the empty cartridge.
  Prevent the unexpected cutting of tissue when there is no staple inside the cartridge.
- One-piece design for the cartridge and cutting knife.
  Better cutting performance.
- Bigger and stable opening of the front fork.
- Cartridge for different tissue thickness can used on the same device.
